

ISLAY

We caught the 'showing bug' and purchased, in 1996, from the same breeder Islay, Rye's half sister. We now decided that all our pet names for the Goldens will be named after various varieties of Iain's favourite tippie (whisky). Sadly Islay became very seriously ill at less than a year old and we nearly lost her. To this day no-one knows why. The vet thought that it may have been a snake bite. Islay never really liked showing but still comes out on the odd occasion to enter veteran classes!
