

HOW IT ALL BEGAN

We started owning goldens in 1980 with a bitch called Chlytemnestra Christa, Christa for short. She was bought as a pet but we didn't realise her quality until years later. We mated her in 1984 to Bryanstown Gaucho. She then had a litter of 7 lovely puppies who ended up scattered to all corners - Scotland, America, South Africa - all with friends of ours. We kept her daughter Fern but unfortunately we were not able to breed from her. In 1995 our interests were rekindled when we purchased Rye.
